CLADDING

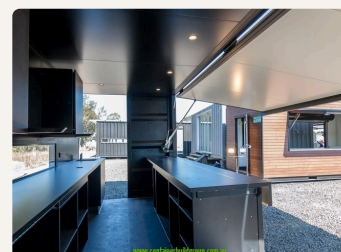

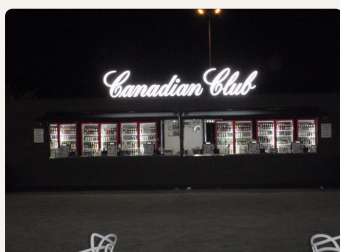

For Weser Ice we produced a lineup of shipping container structures built to their exact specifications: a 40ft main bar, a 20ft beer garden, a 20ft coffee and snacks container, and a custom dangerous goods container to house gas bottles and chemicals on site.

The containers are fully insulated and built in our Australian workshop, then trucked to site and placed by crane. We also produced the construction drawings, 3D render and walk-through video.
